

Royal TS4240 Touch Screen Cash Register

Touch Screen Cash Register with 9" backlit touch panel with user prompts for easy operation.

- Easily program each of the 200 departments with name or description of up to 12 characters. Also, program the appropriate tax rate & individual unit prices. Each department can be set with special features such as gallonage for sales of measured items.
- 3,000 price look-ups! Easily program 12-character names or descriptions to identify each PLU. Reports print sales activity of each PLU.
- 40 clerk I.D. system
- 2 Serial ports to connect bar code reader (optional) to the register & connect your register to your PC. RegisterLink Software includes a filter that downloads your end of day report totals directly to your QuickBooks Pro accounting programs & allows you to program your register from your PC.
- Alphanumeric thermal printer is fast and quiet.
- Automatic tax computation allows you to program up to 4 tax rates (Add-on, VAT, and Canadian)

Restaurant Mode

- Multiple price levels for each PLU. Allows for discounted prices or different pricing during Happy Hour or for lunch menu vs. dinner menu.
- Age Verification - On screen prompts warn the clerk to check customer's ID & verify their age for certain products. Up to 2 different ages can be set such as 18 yr old for tobacco products & 21 yr old for alcohol.
- Table tracking allow floating guest check & table transfer.
- Remote Printer - One remote kitchen or bar printer is supported.
